

SUBJECT INDEX

A

Abdominal dehiscence, 204
Ablerus, 264, 267, 269-70
Acanthocoris sordidus, 336
Acanthoscelides obtectus, 246
Acanthotermes, 206
Acaricides, 437-38
Accessory glands, 233-55
Acephate, 76
Acheta domesticus, 235-36
Acleris variana, 91
Acorhinotermes, 202, 207, 209
Acoustic communication, 178, 485
Action threshold, 453-57
Aculus schlechtendali, 454-57
Acythosiphon kondoi, 347, 349
Adaphrotermes, 211
Aedes, 234, 408-9, 426, 484
 egypti, 61-62, 236, 240,
 245, 248, 408-9, 484
 albopictus, 245
 stimulans, 61
 triseriatus, 240
Age structure, 91
Agelenopsis aperta, 305-6
Aggregation, 98, 301, 326-43
Aglais, 289
Agromyza frontella, 350
Agrotis exclamationis, 323
Aldrin epoxidase, 76-77, 80
Alkanes, 209
Alkenes, 209
Allatectomy, 233, 247, 250
Allelochemicals, 73, 76-84, 483
Allergic reactions, 47-69
Allochronic speciation, 472-73,
 492-93, 495
Allozymes, 407, 409-10, 473,
 483-84, 486, 491-95
Alpigenobomus wurtleini, 184
Alystotermes kilimandjariensis,
 211
Amblyseius fallacis, 439
Amritermes, 203, 205, 207-8,
 211
Amphorophora
 idaei, 481
 rubi, 481
Anagasta kuehniella, 240, 272
Anastrepha, 409
Ancistrotermes, 206-8
Aneristus, 264
 ceroplastae, 272
Anicetus beneficus, 492

Anopheles, 142, 412, 482,
 485
 maculipennis, 143
 stepensi, 482
Anoplotermes, 211
Anthonomus grandis, 338
Antibiosis, 481, 496
Antibodies, 406-7
Ants
 and astronavigation, 281-87
 and pine sawyer, 126
 and spiders, 303
 and termites, 206, 208
 and terpenes, 210-11
Aonidiella aurantii, 104, 264-65
Aphelinidae, 257-76
Aphelinus, 257, 261, 263-65,
 267
 mali, 264-67
Aphids
 and allergies, 58
 and biotypes, 475, 481, 490
 and detoxication, 81
 and IPM, 170, 435, 437, 446,
 448, 451, 454-57
 and migration, 290
 and parasitoids, 90-91, 93,
 257, 264, 266
 and viruses, 168
Aphis
 fabae, 341
 pomi, 349, 454-57
 sambuci, 323
Aphytis, 257, 260-67, 273-74,
 492, 495
 africanus, 264
 chilensis, 265-66
 cochereau, 264
 coheni, 262, 264
 fisheri, 261, 265
 hispanicus, 265
 holoxanthus, 17
 lepidosaphes, 262, 264, 267
 lingnanensis, 261, 264
 melinus, 265
 mytilispidis, 492, 495
 paramaculicornis, 264
 roseni, 264
 theae, 260
 vandenboschi, 264
Apis mellifera, 58
Apple
 IPM, 435-70
 maggot, 421-22, 435, 446,
 451, 453-56, 493
 scab, 443, 446-47, 451

Arboviruses, 138
Archonius, 263
 longiclava, 261
Argas, 149
Argyrostenia velutinana, 443,
 454-56
Armritermes, 202-3, 207
Armyworm, 76-77
Arrhenotok, 100
Artificial diets, 121-123
Ascodipteron, 142
Astronavigation, 277-98
Ateuchotermes rustratus, 211
Attractants for pine sawyer,
 121-22
Autogeny, 143
Automeris, 51
Autothysis, 204, 211
Azotus, 264-71
 atomon, 270
 celsus, 270
 pulcherrimus, 266-67, 270-71

B

Bacterial pathogens, 138
Bait traps, 440, 452
Bark beetles, 339, 476, 484,
 491
Bathyplectes curculionis, 483-84
Bed bugs and allergies, 60-61
Bees, astronavigation of, 281,
 284-87
Bemisia hancocki, 262
Biological control, 17, 89-114,
 257-74, 299-320
Bionomics
 of aphelinids, 257-74
 of bumble bees, 176-77
Biotypes, 471-504
Biston betularia, 483
Black flies, 62, 142-43, 150
Black pineleaf scale, 481-82
Blattella germanica, 55-56
Blister beetles, 63
Blood-sucking anthropods, 137-
 56
Blow flies, 55, 75, 411, 477
Bodenheimer, F. S., 1-23
Body louse, 148
Boll weevil, 476
Bombus, 175-99, 408
 lucorum, 183
 terrestris, 178
 terricola, 190
